- Efficiently dealt with the fast-paced real time service providing through quick thinking and problem-solving skills.
- Committed to teamwork and communication with fellow employees to coordinate on tasks provided.
- Operated the tills and sales registers quickly and effectively.

## **Projects**

### **University Finder Project (C++) (First Semester University Project)**

This project is for helping students from developing countries so that they can apply and get to know about UK universities. This code is written in C++, and it has certain links which takes the user to that specific site of the university. Furthermore, it has all the rankings and tables taken from a valid source and it can help real life students so that they can apply to their favourite universities without spending so much time on unreliable websites and people.

It is available on my portfolio: [https: //masifmuhammad.github.io/](https://masifmuhammad.github.io/)

## **Hobbies and Interests**

My hobbies are travelling, photography and playing football. I am always eager to go out to new places and taking pictures for my social media profile. I love watching football matches and enjoy playing futsal and football. Furthermore, I have got keen interest in upcoming technology.
